TABLE OF CONTENTS

No. 1. January 1941

Observations on cortical somatic sensory mechanisms of cat and monkey. WADE H. MARSHALL, CLINTON N. WOOLSEY and PHILIP BARD 1
Observations on subcortical somatic sensory mechanisms of cats under nembutal anesthesia. WADE H. MARSHALL 25
Pupillodilator reactions to sciatic and diencephalic stimulation. A comparative study in cat and monkey. F. A. WEINSTEIN and M. B. BENDER 44
Flicker potentials and the alpha rhythm in man. JAMES TOMAN 51
Effects of prefrontal lobotomy on depressed patients. PHILIP WORCHEL and J. G. LYERLY 62
Sympathetic preganglionic outflow to limbs of monkeys. DONAL SHEEHAN and AMEDEO S. MARRAZZI 68
Recovery of responsiveness in motor and sensory fibers during the relative refractory period. ERNST TH. von BRÜCKE, MARIE EARLY, and ALEXANDER FORBES 80
Technique and evaluation of the electro-encephalogram. PAULINE A. DAVIS 92
Activity in neurons of the bulbospinal correlation system. DAVID P. C. LLOYD 115

No. 2. March 1941

Development of swimming and righting reflexes in frog (*Rana guentheri*). Effects thereon of transection of central nervous system before hatching. GING-HSI WANG and TSE-WEI LU 137
Thermocoagulation of motor cortex exclusive of its sixth layer. J. P. MURPHY and J. G. DUSSER DE BARENNE 147
Transmission of impulses through the Burdach nucleus. PER OLOF THERMAN 153
Influence of discharge of motoneurons upon excitation of neighboring motoneurons. BIRDSEY RENSHAW 167
A direct central inhibitory action of dromically conducted impulses. DAVID P. C. LLOYD 184
Effects of lesions to corpus striatum upon spontaneous activity in the male rat. FRANK A. BEACH 191
Functional anatomy of brachium pontis. R. S. TURNER and W. J. GERMAN 196

No. 3. May 1941

Multiple motor innervation of the frog's sartorius muscle. BERNHARD KATZ and STEPHEN W. KUFFLER 209
Fast central fibers in fish. Properties of Mauthner and Müller fibers of medullospinal system. HELEN TREDWAY GRAHAM and JAMES O'LEARY 224
Availability of lactic acid for brain oxidations. JOSEPH WORTIS, KARL M. BOWMAN, WALTER GOLDFARB, JOSEPH F. FAZEKAS and HAROLD E. HIMWICH 243
Cortical extinction in convulsions. RUSSELL MEYERS 250
Influence of frequency of stimulus upon response to hypothalamic stimulation. KENDRICK HARE and WILLIAM A. GEOHEGAN 266
Experimental study of gastric activity released from cortical control. FREDERICK H. HESSER, ORTHELLO R. LANGWORTHY and LAWRENCE C. KOLB 274

No. 4. June 1941

Dusser de Barenne Commemoration Number

The "motor" cortex of the chimpanzee. J. G. Dusser de Barenne, Hugh W. Garol and W. S. McCulloch 287
Functional interdependence of sensory cortex and thalamus. J. G. Dusser de Barenne and W. S. McCulloch 304
Suppression of motor response obtained from area 4 by stimulation of area 4s. J. G. Dusser de Barenne and W. S. McCulloch 311
Functional organization of sensory and adjacent cortex. J. G. Dusser de Barenne, H. W. Garol and W. S. McCulloch 324

No. 5. July 1941

Ernst Theodor von Brücke 1880–1941. Alexander Forbes 321
Cerebral blood flow and pH in excessive cortical discharge induced by metrazol and electrical stimulation. Herbert Jasper and Theodore C. Erickson 333
Relation between electrical changes during nerve activity and concentration of choline esterase. D. Nachmansohn and B. Meyerhof 348
Nature of the "endplate potential" in curarized muscle. John C. Eccles, Bernhard Katz, and Stephen W. Kuffler 362
Isolation of intrinsic and motor mechanism of the monkey's spinal cord. Sarah Tower, David Bodian and Howard Howe 388
Fibrillation in skeletal muscle in relation to denervation and to inactivation without denervation. Sarah Tower, Howard Howe and David Bodian 398
Initiation of muscle impulses at neuro-muscular junction. John C. Eccles and Stephen W. Kuffler 402
The human electrocorticogram. John E. Scarff and Walter E. Rahm, Jr. 418

No. 6. September 1941

Effect of chronic painful lesions on dorsal root reflexes in dog. R. Anderson, W. K. Livingston and R. S. Dow 427
Reflex activity in the spinal extensors. J. S. Denslow and G. H. Clough 430
Steady potential fields and neurone activity. B. Libet and R. W. Gerard 438
Fatigue and refractoriness in nerve. Ernst Th. von Brücke, Marie Early and Alexander Forbes 456
Acetylcholine esterase concentration during the development of the human fetus. Karl A. Youngstrom 473
Localization of cerebral center activating heat-loss mechanisms in monkeys. Lindsay E. Beaton, William A. McKinley, C. M. Berry and S. W. Ranson 478
The endplate potential during and after the muscle spike potential. John C. Eccles and Stephen W. Kuffler 486

No. 7. November 1941

On the alleged synchronization of proprioceptive impulses within spinal ganglia. Ernst Th. von Brücke and Marie Early 507
Hyperactivity in monkeys following lesions of the frontal lobes. Margaret A. Kennard, Susan Spencer and G. Fountain, Jr. 512
The spinal mechanism of the pyramidal system in cats. David P. C. Lloyd 525
Crossed inhibition of the flexor reflex in the spinal mammal. Grayson P. McCouch, Joseph Hughes and Winifred B. Stewart 547
Cortical origin and distribution of corpus callosum and anterior commissure in the monkey (*Macaca mulatta*). Warren S. McCulloch and Hugh W. Garol 555
Cortical origin and distribution of corpus callosum and anterior commissure in chimpanzee (*Pan satyrus*) P. Bailey, H. W. Garol and W. S. McCulloch 564
Potassium and water changes in excised nerve on stimulation. V. Arnett and W. S. Wilde 572
Index 579
